

My community essays

Gustavo Garcia

In my neighborhood or community there was a problem with people getting their houses broken into. For example, a while back, my next-door Neighbor had a glass back door window and someone broke into it and robbed them. So, I'm going to talk about three ways how we got rid of the problem. First, Cameras Second, Police Officers Third, neighborhood app. Let me tell you a little more.

First, I'm going to talk about 1 way we got rid of the problem, "CAMERAS". Cameras are especially important to catch someone doing something they are not supposed to do. In one of the entrances to my neighborhood or community someone put a camera to look at the license plate or just a guy walking around so if that someone did something and got away with the car or ran, they would see it on the camera, and then we can report it. Also, your house is your gem or a special thing that you have, so you would want to protect it am I right, so you would want cameras to check some suspicious activity around your house? My neighbor's house usually has a camera or two so no one can do something to their houses like break in, steal a car, or do anything in general.

Another way we got rid of break ins is, "POLICE OFFICERS". In my neighborhood or community, we have a lot of police that live in the houses. So, every time I bike around my community, I see some of the police officers going to work or coming back from work so I feel safe that there will be active police in the neighborhood to protect us. Police officers are cool, they have Dogs to help in a situation, for example the dogs can sniff any drugs, or they can sense an intense change in someone's body like if there nervous, afraid, or sad and that helps police officers know that something is up. Another reason that police officers are cool, is there badge, it can give off a feeling that says I have more authority than you and you should respect me.

Let me stop talking about police because your probably bored reading about police so let get into a third way we got rid of the problem, "NEIGHBORHOOD APP". In my neighborhood or community, we have this app where if you report something like that you're missing (like a dog or cat) you can report it and the community will see and be on alert. Also going back to my first reason, "CAMERAS" I said, "they would see it on the camera, and then we can report it.", the way we reported something that we saw on the cameras is through the neighborhood app and everyone will know and some of the police that live there will know. But since there aren't many robberies, we just use it to say something like if they need help with something or they are doing a business, and someone wants to get something or just to say something.

So, I talked about three ways our community got rid of the problem. Do you have a problem in your community, or did you have a problem? If you did how did you get rid of it or how are you getting rid of it?
