

Jaylen Avila

Period 2

Many people have many problems in their community. While others sit around and do nothing there are things that you can do. The people of my community should help to help prevent drug use, littering, and inadequate emergency services.

To commence, people of my community should help prevent drug use in the neighborhood. In my neighborhood there are people who use a vape and just leave it on the grass where kids play. People in my community also smoke out in the open so that other people can breathe in that toxic air. Those things can not only can be harmful for the people it can also be harmful for the plants and trees we have. The use of drugs not only can harm a person but can kill you

In addition, the people of my community should help prevent littering in the neighborhood. Littering is common in my community and is dangerous to the animals who live in the lake and to the animals that live on land like ducks for instance. Littering in my neighborhood can also be dangerous to the environment. One way to help this problem is to pick up trash left on the floor even if it is not yours.

To continue, in my community people should help inadequate emergency services. People should help in my community because that way if there is an emergency the help would come faster. Having help faster could lower the chances of someone getting injures or prevent death. Someone that is there to help could get hurt more easily because they are working alone. One way to help this situation would be for them to have more people on standby just in case of an emergency.

To wrap it up, the people of my community should help the community to help prevent drug use, littering, and inadequate emergency services. People who would be able to help with these problems could really improve the community and lifestyle. What would you do to help change problems in the community?
