

Walter Cruz Period 3 8/26/2021. Many communities have problems with their neighborhood. My neighborhood is one of these many neighborhoods that has one of these problems. The problem is people not picking up their trash or not picking up after their dog. This affects the wildlife, people, and me included. From my perspective this makes the neighborhood smell awful and gives the community a bad reputation

One of the reasons, that this affects my neighborhood is that more of the animals are dying to mistaking garbage for food and garbage sometimes kill animals. Sometimes these get diseases from eating or ingesting garbage. These diseases can be transmitted to humans with bites and scratches. This can make people sick and maybe die of these diseases. This is one of the many problems this garbage causes.

Another reason that this garbage is affecting the neighborhood is that it causes people to avoid the community. They leave because they don't like the smell of garbage and dog poop. This makes people avoid and move from the neighborhood which makes the rate of money coming to the neighborhood very low. This means that the neighborhood is not able to pay for the expenses of the water flowing through out the neighborhoods homes. This is a huge problem.

Finally, the last reason is that all the trash and the problems. These problems include, Tons of trash, Dog poop everywhere, the community is short on money and can barely afford to pay for water expenses. Before then I thought that the police would do something about these problems, but I was wrong. You can be fined for polluting, but I never see anyone get fined or charged for polluting. This might be because the police have very small numbers in my neighborhood. There are only 2-3 police officers in the neighborhood.

In conclusion, my neighborhood has a huge problem with pollution. The animals suffer greatly. People don't live in this community because of the pollution and smell. When the people leave, the community loses money to pay for the water for the people who still live there. And there are only 2-3 police in the neighborhood and they do not enforce to not pollute the neighborhood.
